

IAN BIN SYAHRUL AZLAN

SEEKING 3RD YEAR APPRENTICESHIP

As a third-year student in the Computer Science BUT program (specializing in Application Development), I am seeking a work-study placement based on a schedule of alternating between one month at the company and one month in university. Following a 12-week internship at the CNRS focused on web application development and maintenance, I have developed skills in software and web development, databases, Linux systems, debugging, testing, and application maintenance. I am now eager to put these skills into practice and contribute to real-world IT projects.

Start date possible up to November 30, 2026, depending on company needs

LANGUAGES

Malay (native)
English - C2 (Bilingual)
French (B2 level)

ACTIVITIES & INTERESTS

- Photographer for Malaysian student events in France
- South Regional Council (MASAF) – Event organization
- Sports: Hockey, Archery | Interests: Travel, Baking

EDUCATION

BUT (Bachelor's Degree in Computer Science) – Application Development

IUT Paul Sabatier, University of Toulouse III | 2023 - Present

Pre-University Programme (Malaysia-France Cooperation)

University of Tours - IUT de Tours | 2022 - 2023

- Achieved French language level B2

Sijil Pelajaran Malaysia (SPM)

Tuanku Munawir Science School, Malaysia | 2017 - 2022

- National Secondary School Certificate | 9A+

PROFESSIONAL EXPERIENCE

Web Developer Intern | CNRS - CBI (ISFinder)
Toulouse | April 2026 – June 2026

- Migration of ISfinder/ISadmin from legacy PHP to PHP 8.5 on a production research platform
- Identification and isolation of a critical architectural risk (external writes to the internal database)
- Rebuilding the CAPTCHA and modernizing the BLAST search module
- Development of four administration tools (CSV export, reference management, detection of incomplete records)

RELEVANT PROJECTS

Toulouse Parking (Team academic project) – 2025

- Designed and implemented a relational database using PL/SQL
- Developed a Java graphical user interface using Eclipse (WindowBuilder)
- Collaborated within a team using the SCRUM methodology

Sales Management Application – Agricultural Products (Academic project) – 2025

- Developed a Java application for inventory and sales management
- Implemented business logic and the user interface (UI)
- Modeled system architecture using UML diagrams (Modelio)

WeatherNow (Personal project) – 2025

- Developed a responsive web application using React
- Integrated and utilized external REST APIs with a mobile-first approach

Other projects are available on GitHub and in my personal portfolio.
